

## Diesel Generator Set

# 16V2000 DS1000

Air charge-air cooling/1000kVA/50 Hz/ standby power (fuel consumption optimized)/380 - 415V

Optional equipment shown. Standard equipment and colors (base frame, generator: grey, engine: blue) may vary.

## **Product highlights**

#### Benefits

- Industry-leading average load factor
- Outstanding fuel economy
- Optimized maintenance intervals
- Low installation costs

- Best-in-class reliability and availability
- Lifting vertically or with diagonal pull
- Compact design

# System ratings 1)

| Standby power   | 16V2000 DS1000 | 16V2000 DS1000 | 16V2000 DS1000 |
|-----------------|----------------|----------------|----------------|
| Voltage (L-L)   | 380V           | 400V           | 415V           |
| Phase           | 3              | 3              | 3              |
| PF              | 0.8            | 0.8            | 0.8            |
| Hz              | 50             | 50             | 50             |
| kW              | 800            | 800            | 800            |
| kVA             | 1000           | 1000           | 1000           |
| Amps            | 1519           | 1443           | 1319           |
| Generator model | 575RSL7074     | 575RSL7074     | 575RSL7074     |
| Temp rise       | 150°C/40°C     | 150°C/40°C     | 150°C/40°C     |
| Connection      | 6 LEAD HI WYE  | 6 LEAD HI WYE  | 6 LEAD HI WYE  |

1 Power available up to 40°C/400 m

#### Certifications and standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 9001:2008 and ISO 14001:2004
- Performance Assurance Certification (PAC)
  - Engine-generator set tested according to ISO 8528-5 for transient response
  - Verified product design, quality and performance integrity
  - All engine systems are prototype and factory tested

- Power rating
  - Permissible average power output during 24 hours of operation up to 85%

## Standard equipment 1)

#### **Engine**

- Air filters
- Oil pump for draining
- Full flow oil filters
- Closed crankcase ventilation
- Jacket water pump
- Thermostats
- Exhaust manifold dry
- Belt driven radiator fan
- Radiator unit mounted
- Electric starting motor 24V
- Governor electronic isochronous
- Base formed steel
- SAE flywheel & bell housing
- Charging alternator
- Flexible fuel connectors
- Flexible exhaust connection

#### Generator

- NEMA MG1, IEEE and ANSI standards compliance for temperature rise and motor
- VDE 0530, IEC 60034-1, BS 4999, BS 5000, CSA 22.2-100, AS 1359
- Sustained short circuit current of up to 250% of the rated current for up to 10 seconds
- Self-ventilated and drip-proof IP23
- Superior voltage waveform
- Digital, volts-per-hertz regulator
- No load to full load regulation
- Brushless alternator with brushless pilot exciter
- 4 Pole, rotating field
- 150 °C maximum standby temperature rise
- Heavy duty shielded ball bearings with a minimum B-10 life of 40.000 hrs
- Flexible coupling
- Full amortisseur windings
- 3-phase voltage sensing
- ±0.25% voltage regulation
- 100% of rated load one step according to NFPA 110
- 3% maximum harmonic content

#### Standard features 1)

- The engine-generator set complies to G3
- Engine generator set tested according to ISO 8528-5 for transient response
- Accepts rated load in one step as per NFPA 110
- All engine-generator sets are type and factory tested
- Global product support
- Cooling System (integral set-mounted; engine driven fan)
- 16V2000 diesel engine (31,84 liter (1943 cu inch) displacement; 4-stroke)
- Engine-generator resiliently mounted
- Complete range of accessories
- Brushless, rotating field generator (PMG excitation;
   250% short circuit capability; 2/3 pitch stator windings)
- Complete system metering
- LCD display

# Application data

| Manufacturer                       | MTU                    |
|------------------------------------|------------------------|
| Model                              | 16V2000G25TD           |
| Туре                               | 4-stroke               |
| Arrangement                        | 16V                    |
| Displacement/cylinder: I (cu inch) | 1.99 (121)             |
| Bore: mm (inch)                    | 130 (5.1)              |
| Stroke: mm (inch)                  | 150 (5.9)              |
| Compression ratio                  | 16:1                   |
| Rated speed: rpm                   | 1500                   |
| Engine governor                    | electronic isochronous |
| Max power: kWm (bhp)               | 890 (1197)             |
| Speed regulation                   | ±0.25%                 |
| Air filter                         | dry                    |
|                                    |                        |

#### Lube oil capacity

Total oil system: I (gal) 102 (27)

#### **Electrical**

Electric Volts DC 24
Cold cranking amps under -17.8°C (0°F) 1000

#### Fuel system

Fuel supply connection size  $M22 \times 1,5 - 60^{\circ}/male$  Fuel return connection size  $M12 \times 1,5 - 60^{\circ}/male$  Maximum fuel lift: m (ft) 5 (16) Recommended fuel see MTU fluids & lubrication spec. Total fuel flow: 1/hr (gal/hr) 600 (159)

#### Fuel consumption<sup>1)</sup>

|                          | gal/hr | l/hr | g/kwh |
|--------------------------|--------|------|-------|
| At 100% of power rating: | 56     | 212  | 198   |
| At 75% of power rating:  | 42     | 158  | 196   |
| At 50% of power rating:  | 28     | 108  | 201   |

#### Cooling/radiator system

| ,  |                                |
|--|--------------------------------|
| Ambient capacity of radiator: °C                       | 40 (optional 50) <sup>2)</sup> |
| Max. restriction of cooling air, intake,               |                                |
| and discharge side of rad.: kPa (in. H <sub>2</sub> 0) | 0,2 (0,803)                    |
| Water pump capacity: I/min (gpm)                       | 667 (176)                      |
| Heat rejection to coolant: kW (BTUM)                   | 400 (22,748)                   |
| Heat rejection to after cooler: kW (BTUM)              | 170 (9,668)                    |
| Heat radiated to ambient: kW (BTUM)                    | 45 (2,559)                     |
| Engine coolant capacity: I (gal)                       | 110 (29)                       |
| Coolant to cooler temperature: °C (°F)                 | 95 (203)                       |
|  |                                |

#### Air requirements<sup>3)</sup>

Aspirating:  $m^3/min$  (SCFM) 66 (2329) Air flow required for rad. cooled unit:  $m^3/min$  1236 (43606)

#### **Exhaust system**

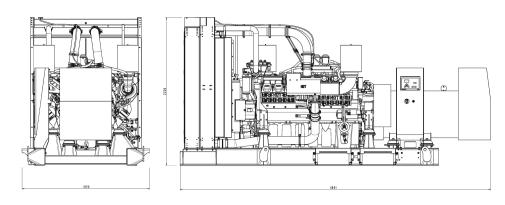

| Gas temp. (stack): °C (°F)           | 530 (986)  |
|--------------------------------------|------------|
| Gas volume flow temp: m³/min (SCFM)  | 180 (6350) |
| Maximum allowable back pressure: kPA | 8,5 (34)   |

Values in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml.

<sup>2</sup> System ratings at 50°C may differ.

<sup>3</sup> Air density =  $1.184 \text{ kg/m}^3 (0.0739 \text{ lbm/ft}^3)$ 

## Weights and dimensions

Drawing above for illustration purposes only, based on standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

| System                | Dimensions (LxWxH)                         | Weight (dry/less tank) |
|-----------------------|--|------------------------|
| Open power unit (OPU) | 4691 x 1920 x 2226 mm (185 x 76 x 88 inch) | 6388 kg (14,084 lbs)   |

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

#### Sound data

Consult your local MTU distributor for sound data.

#### **Emissions data**

- Consult your local MTU distributor for emissions data.

## Rating definitions and conditions

- Standby ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. No overload capability for this rating. Ratings are in accordance with ISO 8528-1, ISO-3046-1, BS 5514 and AS 2789. Average load factor: ≤ 85%. Operating hours/year: max. 500.
- Consult your local MTU distributor for derating information.
