

Diesel Generator Set

MTU 18V2000 DS1400

380V - 415V/50 Hz/standardized backup/fuel consumptiom optimized 18V2000G76F/air charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability and availability of power
- Long maintenance intervals
- Optimized ratio between size and power
- Wide operating range without derating

Suppor

- Global product support offered

Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to G3 according to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

Power rating

- System rating: 1400 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 85% load factor for continuous power applications
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

Complete range of accessories available

- Control panel
- Power panel
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical radiator
- Oversized voltage alternators

Emissions

Fuel consumption optimized

Certifications

- CE certification option
- VDE4110 Certification

Application data 1)

	Fuel consump	tion optimized ²	Fuel consumption	n optimized²
Engine			Combustion air requirements	
Manufacturer		MTU	Combustion air volume: m³/s	1.51
Model		18V2000G76F	Max. air intake restriction: mbar	40
Type		4-cycle		
Arrangement		18V	Cooling/radiator system	
Displacement: I		40.2	Coolant flow rate (HT circuit): m³/hr	46.3
Bore: mm		135	Heat rejection to coolant: kW	475
Stroke: mm		156	Heat rejection to charge air: kW	285
Compression ratio		17.5	Heat radiated to ambient: kW	45
Rated speed: rpm		1500	Fan power for mech. radiator (40°C): kWm	43.4
Engine governor		ADEC (ECU 9)	Fan power for mech. radiator (50°C): kWm	55.6
Speed regulation		± 0.25%	Air flow required for mech. radiator	
Max power: kWm		1235	(40°C) cooled unit: m³/min	1462
Mean effective pressure: bar		24.6	Air flow required for mech. radiator	
Air cleaner		Dry	(50°C) cooled unit: m³/min	1776
			Engine coolant capacity (without cooling equipment): l	73
Fuel system			Radiator coolant capacity (40°C): l	83
Maximum fuel lift: m		5	Radiator coolant capacity (50°C): l	106
Total fuel flow: I/min		30	Max. coolant temperature (warning): °C	102
			Max. coolant temperature (shutdown): °C	105
Fuel consumption 2)	l/hr	g/kwh		
At 100% of power rating:	286	192	Exhaust system	
At 75% of power rating:	210	188	Exhaust gas temp. (after turbocharger): °C	495
At 50% of power rating:	143	192	Exhaust gas volume: m³/s	3.95
			Maximum allowable back pressure: mbar	50
Lube oil system			Minimum allowable back pressure: mbar	30
Total oil system capacity: l		110		
Max. lube oil temperature (alarm): °C		103	Cenerator	
Max. lube oil temperature (shutdown): °C		105	Protection class	IP23
Min. lube oil pressure (alarm): bar		4.5	Insulation class	Н
Min. lube oil pressure (shutdown): bar		4	Voltage regulation (steady state)	± 0.25%
			Rado interference class	N

All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

² Emission optimized data refer to TA-Luft optimized and NEA (ORDE) optimized/Tier 2 compliant engines. Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

Standard and optional features

System ratings (kW/kVA)

Generator model	Voltage	with mechanical radiator**		
		kWel	kVA*	AMPS

Engine

- 4-Cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Full flow oil filters

- Closed crankcase ventilation
- Governor-electronic isochronous ADEC/ECU9
- Common rail fuel injection
- Dry exhaust manifold
- Electric starting motor (24V)
- Fuel consumption optimized engine

Generator

- Leroy Somer low voltage generator
- Meets NEMA MG1, BS5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528 requirements
- Superior voltage waveform
- Solid state, volts-per-Hertz regulator
- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater

- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP 23
- less than 5% harmonic distorsion
- 2/3 pitch stator windings
- No load to full load regulation
- ± 0.25% voltage regulation no load to full load
- Insulation class H, utilization acc. to H
- Radio suppression EN55011, group 1, cl. B
- Short circuit capability 3xln for 10sec

- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds (Leroy Somer generator)
- Winding and bearing RTDs (without monitoring)
- Excitation by AREP + PMI
- Mounting of CT's: 3x 2 core CT's
- Voltage setpoint adjustment ±10V
- ☐ Sustained short circuit current of up to 250% of the rated current for up to 10 seconds (Marathon generator)
- ☐ Marathon low voltage generator
- ☐ Oversized generatoror

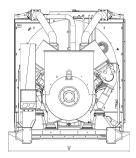

^{**} BE, fuel optimized: max. power available up to: open power unit 40°C/400m; TAL, EPA Tier 2 compl., NEA: standard operating conditions/open power unit 25°C/100m Electrical outputs may vary depending on generator voltage and ambient conditions. For power outputs consult your MTU dealer. Intake air depression/mbar: 15mbar Exhaust back pressure/mbar: 30mbar

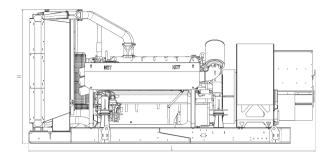

Standard and optional features

Air charge air coolingMechanical radiator	☐ Jacket water heater
 □ Mains parallel operation of multiple gensets (V7) □ Basler controller □ Deif controller □ Complete system metering □ Digital metering ■ Engine parameters ■ Generator Protection Functions ■ Engine protection ■ SAE J1939 engine ECU communications ■ Parametrization software ■ Multilingual capability ■ Multiple programmable contact inputs ■ Multiple contact outputs ■ Event recording 	■ IP 54 front panel rating with integrated gasket □ Different expansion modules □ Remote annunciator □ Daytank control □ Generator winding temperature monitoring □ Generator bearing temperature monitoring □ Differential protection with multi-function protection relay □ Modbus TCP-IP
☐ Supply for battery charger☐ Supply for jacket water heater	☐ Plug socket cabinet for 230V compatible Euro
Fuel filter with water separatorSwitchable fuel filter with water separator	☐ Fuel cooler
 Starter batteries, cables, rack, disconnect switch 	☐ Battery charger☐ Redundant starter 2x 7.5kW
Resilient engine and generator mounting	■ Modular base frame design
☐ Exhaust silencer with 30 dB(A) sound attenuation	Exhaust silencer with40 dB(A) sound attenuationY-connection-pipe
	Mains parallel operation of multiple gensets (V7) Basler controller Deif controller Complete system metering Digital metering Engine parameters Generator Protection Functions Engine protection SAE J1939 engine ECU communications Parametrization software Multilingual capability Multiple programmable contact inputs Multiple contact outputs Event recording Supply for battery charger Supply for jacket water heater Fuel filter with water separator Switchable fuel filter with water separator Switchable fuel filter with water separator Starter batteries, cables, rack, disconnect switch Resilient engine and generator mounting

Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	4720 x 1990 x 2200 mm	7700 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

Consult your local MTU distributor for sound data.

Emissions data

- Consult your local MTU distributor for emissions data.

Rating definitions and conditions

- Standardized backup apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. No overload capability for this rating. Ratings are in accordance with ISO 8528-1, ISO-3046-1, BS 5514 and AS 2789. Average load factor: ≤ 85%. Operating hours/year: max. 500.
- Consult your local MTU distributor for derating information.
